

Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)

Owner *

 Pincaro23 ▾

Repository name *

/ ExamenEEDDT4-Manuel ✓

Great repository names are short and memorable. Need inspiration? How about [super-broccoli](#)?

Description (optional)

Public

Anyone on the internet can see this repository. You choose who can commit.

Private

You choose who can see and commit to this repository.

Initialize this repository with:

Skip this step if you're importing an existing repository.

☐ Add a README file

This is where you can write a long description for your project. [Learn more.](#)

Add .gitignore

Choose which files not to track from a list of templates. [Learn more.](#)

.gitignore template: None ▾

Choose a license

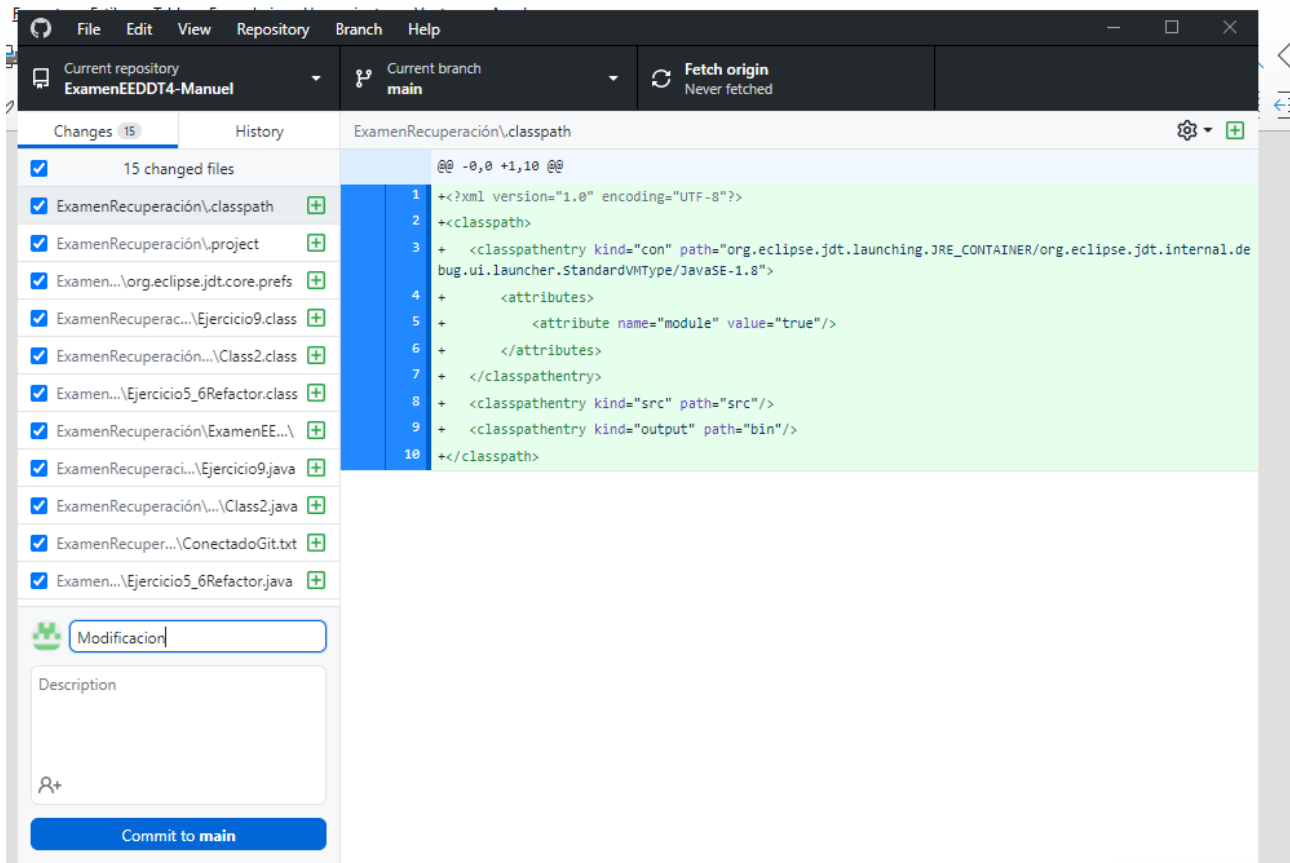

A license tells others what they can and can't do with your code. [Learn more.](#)

License: GNU General Public ... ▾

 You are creating a public repository in your personal account.

Create repository

Crear repositorio.

Hacemos los cambios, le ponemos nombre y damos en commit to main.

main	ExamenEEDDT4-Manuel / ExamenRecuperación /	Go to file	Add file	...
